EIGHT AREAS. ONE WORKSPACE.

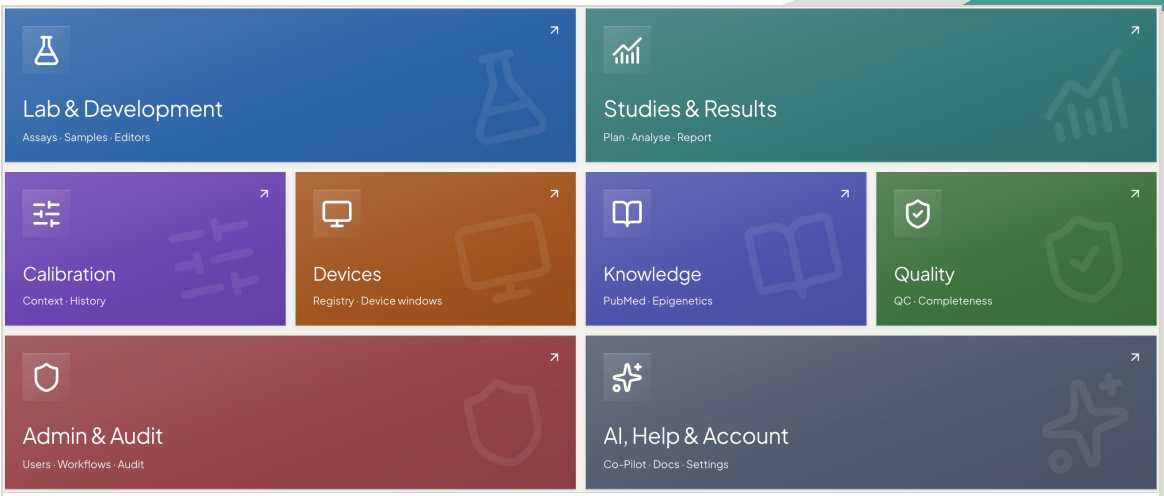

YOUR TOOLS. ONE WORKSPACE.

Find your next step in Phoenix Assay Pro.

NAVIGATION

MAIN MENU

Interface details from Phoenix Demo. Development preview.

Lab & development

Assays, samples, lots and assay editors.

Context & calibration

Instruments, methods, reagent lots and calibration history.

Science & knowledge

PubMed literature and epigenetics tools.

Administration & audit

Users, workflow profiles and audit views.

Studies & results

Plan studies, evaluate data and review reports.

Devices

Device profiles and reader windows.

Quality & completeness

Quality control, QC materials and completeness views.

AI, help & account

Co-Pilot, documentation and personal settings.

FIVE STAGES. ONE DIRECTION.

FROM DATA. TO MARKET.

Connect your evidence. Prepare your next market milestone.

01

CONNECT

Bring data and context together.

02

EVALUATE

Review the evidence.

03

REPORT

Build a structured report.

04 PREPARE

SUBMISSION

Prepare for external review.

05 YOUR GOAL

MARKET READY

Work towards your next market milestone.

Phoenix connects the evidence. Your team leads the path to market.

ASSAY VALIDATION IN PHOENIX ASSAY PRO

TEN STUDY TYPES. ONE WORKSPACE.

10

VALIDATION STUDY TYPES

01 Precision
02 Method comparison
03 Linearity
04 LoD / LoQ
05 Reference interval
06 Lot comparison
07 Stability
08 Interference
09 Carryover
10 Measurement uncertainty

Keep validation moving.

Choose your study. Review the evidence. Build your report.

QC

See variation.
Levey-Jennings + Westgard.

EQA

z-scores and bias
by analyte.

AI

Optional AI narratives.
PubMed literature.
